Examining the Role of Nurses' Racial Bias in Black Maternal Health Outcomes

The stark disparities in Black maternal health outcomes demand deeper investigation. While we recognize the presence of racial bias in healthcare, primarily focusing on physicians, this talk turns the spotlight towards a critical, yet neglected, area: nurses' potential role. Join us as we explore the impact of nurses' unconscious biases on Black mothers' healthcare experiences. We'll delve into the prevalence and consequences of these biases, uncovering how they may influence perceptions of Black mothers' health and translate into real-world care. .

Exploring Microwave Reactions to "Cook Up" New Organic Compounds

This talk explores its crucial role in pharmaceuticals, agriculture, fuels, and food. Witness groundbreaking research using innovative microwave techniques to rapidly create new compounds, engaging even undergraduate assistants. Discover how this research not only broadens participation in STEM but also helps students grasp chemistry's real-world impact. Join us and be inspired by the future of chemistry!

This meeting will be held via Zoom video conferencing.
